

**10<sup>th</sup> SYMPOSIUM ON TRENDS IN FUNCTIONAL PROGRAMMING**  
**TFP 2009**  
**SELYE JANOS UNIVERSITY, KOMARNO, SLOVAKIA, JUNE 2-4, 2009**

	<b>TITLES</b>	<b>AUTHORS</b>	<b>Starting page in proc.</b>
Tuesday, June 2	<b><i>Parallel and Distributed Functional Programming</i></b>		
9-10.30	1. Graph-based Communication in Eden	Thomas Horstmeyer, Rita Loogen	261
	2. Compiling Concurrency Correctly: Cutting Out the Middle Man	Liyang HU, Graham Hutton	195
	3. Towards Compiling SAC to CUDA	Jing Guo, Jeyarajan Thiyagalingam, Sven-Bodo Scholz	74
	<i>coffee break</i>		
Tuesday, June 2.	<b><i>Semantics</i></b>		
11-12.30	1. An Operational Semantics for Distributed Lazy Evaluation	Lidia Sánchez-Gil, Mercedes Hidalgo-Herrero, Yolanda Ortega-Mallén	222
	2. On Graph Rewriting, Reduction and Evaluation	Ian Zerny	164
	3. Monadic Fold, Monadic Build, Monadic Short Cut Fusion	Patricia Johann, Neil Ghani	9
	<i>lunch</i>		
Tuesday, June 2	<b><i>Verification</i></b>		
14-15.30	1. Compositional Timing Verification with Dependently Typed Program Abstractions	Christoph Herrmann, Kevin Hammond	24
	2. A Reflection-based Proof Tactic for Lattices in Coq	Daniel W. H. James, Ralf Hinze	143
	3. Case Study : A Formal Method Tool Implemented in Haskell	Marc Fontaine	240
	<i>coffee break</i>		
Tuesday, June 2	<b><i>Interactive Programming and Refactoring</i></b>		
16-17.30	1. Interactive Programming	Roly Perera	298
	2. Signals, Not Generators!	Wolfgang Jeltsch	283
	3. Detaching and Reconstructing the Documentary Structure of Source Code	Péter Diviánszky, Attila Góbi, Dániel Leskó, Mónika Mészáros, Gábor Páli	43

Wednesday, June 3 **Types**

9-10.30	1. Liberating Haskell Type Class Design by Automatic Generation of Instance Modules and Restricted-Type Wrappers	Wolfram Kahl	313
	2. Generic Programming for Domain Reasoners	Johan Jeuring, José Pedro Magalhães, Bastiaan Heeren	154
	3. Spreading the Joy: Making "Stricterness" More Relevant	Stefan Holdermans, Jurriaan Hage	179

*coffee break*

Wednesday, June 3 **Applications**

11-12.30	1. Modeling probability in Haskell programming language	Ondrej Šuch	252
	2. Braincurry: A Domain-specific Language for Integrative Neuroscience	Tom Nielsen, Tom Matheson, Henrik Nilsson	90
	3. Expressing C++ Template Metaprograms as Lambda expressions	Ábel Sinkovics, Zoltán Porkoláb	97

*lunch*

**EXCURSION & BANQUET**

Thursday, June 4 **Resource Analysis**

9-10.30	1. An application of Hume analysis to imperative programs with pointers	Gudmund Grov, Greg Michaelson, Hans-Wolfgang Loidl, Christoph Herrmann, Steffen Jost, Kevin Hammond	27
	2. Collected Size Semantics for Functional Programs over Polymorphic Nested Lists	Olha Shkaravska, Marko van Eekelen, Alejandro Tamalet	207
	3. Optimal worst-case fully persistent arrays	Milan Straka	59

*coffee break*

Thursday, June 4 **Functional Programming on Multi-core**

11-12.30	1. Benchmarking Parallel Haskells Using Scientific Computing Algorithms	Oleg Lobachev, Rita Loogen	274
	2. Low Pain vs Pain Multi-core Haskells	Mustafa KH. Aswad, Phil Trinder, Abdallah Al Zain, Greg Michaelson, Jost Berthold	112
	3. Multi-Core Parallelisation for HUME	Abdallah Al Zain, Greg Michaelson, Kevin Hammond	131

*lunch*
