## Reallocation

- Reclassification from state-financed scholarship holder to self-financed financing
- When cannot be a student reallocated?
- Reclassification self-financed financing to state-financed scholarship holder

# Reallocation

Reclassification from state-financed scholarship holder to self-financed financing

The essence of the reallocation process is to reclassify the lower-performing state scholarship holder students into self-financed financing, and to fill the vacant state scholarship holder places with well-performing self-financed students (reclassification). The last two active semesters are the relevant semesters for all relevant courses.

## Reclassification process

We put each affected training programme into the corresponding student group, and then calculate the following:

- **Number of obtained credits**
- **Totalized corrected credit index**
- **The minimum grade average** in (2.75 in the case of Computer Science)
- **The minimum credit average** in (in the case of Computer Science, this is 30 cr.)

$$\frac{\sum credit_i * grade_i}{60} * \frac{credits\_obtained}{credits\_registered}$$

Totalized corrected credit index (TCCI)  
formula

You can read more about the reclassification on the [Q-tér](#).

Those who have used up their state-funded scholarship semesters will also be automatically reclassified. You can read more about this [HERE](#).

# When cannot be a student reallocated?

A training is excluded from the scope of those affected if one of the following is fulfilled:

- The student does not have two semesters in "active" status.
- The level of the training is neither Bachelor's, Single-cycle, Master's programme, Advanced level vocational training or Higher education vocational training.

You are exempt from reallocation if one of the following cases occurred in at least one semester in the last two active semesters on which the reclassification was based (in these cases, it is not necessary to submit a request)

- you participated in the Erasmus, CEEPUS scholarship programme
- you are a registered student with special needs
- you were granted a uniquely tailored study arrangement for the semester

Exemption from reallocation can be requested until the last workday of the fifth week of the spring semester's exam period Neptun (Administration > Requests> IK - Átsorolás alóli mentesség) if either of the following cases is applicable:

- illness which hindered your studies
- child-birth
- other reasons that cannot be attributed to the student (vis major cases such as based on a credit transfer decision, if you are unable to register for a sufficient number of credits in the two semesters on which the reclassification is based)

If the deadline is missed, the application will be automatically rejected.  
The Faculty Study Committee decides on exemption from reallocation.

# Reallocation

Reclassification self-financed financing  
to state-financed scholarship holder

We try to accept a student participating in self-financed students for every state-financed place that becomes available. Those self-financed training programmes can be reallocated from self-financed to state-financed finances that meet the following conditions:

- The student submitted a request in Neptun that he/she would like to be reclassified to state-financed student (**Administration/Recategorization**).
- The training is not excluded in the relevant semester from the reallocation process.
- The students who started their studies the academic year 2016/17 or later and have the minimum of 30 credit average and minimum grade average of 2,75.
- If there are more trainings concerned, the one with the higher TCCI is considered as relevant. If the students have the same TCCI, they will be only reallocated if all of the students can be.

**A student cannot be allocated to state-financed status if the student used up their state-financed semesters.**

$$\frac{\sum credit_i * grade_i}{60} * \frac{credits\_obtained}{credits\_registered}$$
